

# LOADMASTER MASTER LITE

## THE UK'S TOP SELLING TIPPER BODY

Loadmaster Lite is the UK's favourite tipper body. Why? Because it's strong, rugged and practical, whilst still providing a really good payload potential. On any chassis, the result is a tipper that's productive and versatile, whatever the task in hand. Performance like this also guarantees top residuals when the time comes to sell. Loadmaster Lite delivers 100%. **That's why it's Number 1.**

# LOAD MASTER LITE

## WHAT MAKES LOADMASTER LITE A WINNER?

- Tough, wear resistant Hardox floor
- Single skin Hardox sides
- High payload potential
- Versatile, rugged and productive
- Manual or automatic tailgates
- Modern, low maintenance design
- Full range of options and safety equipment
- Top residuals for minimal cost of ownership

*"18 years ago, our company bought the first ever Loadmaster. It just looked so obviously right. There was an intelligence in its design that just set it apart from anything else that was then available. Obviously, we didn't know if it would work or not, but I'm a firm believer in that if something looks right, then usually it is right.*

*The fact is Loadmaster was right, and right in every way. Since then, we've maybe had around 100 new tippers fitted with Loadmasters, with another 16 new ones going on the road right now. In this industry, Loadmaster is a true icon."*
